

## Which is right for me?

### Canary Basic

All of the Inventory tools plus:

#### Alarms

Real-time alarm notifications let you know when you have an issue on site.

#### Compliance

Canary automatically captures ATG slips required for compliance based on your tank monitor configuration (e.g. CSLD, Sensor Status).

#### Remote Control

Use our ATG Command Center to remotely poll reports from your tank monitor with the click of a button.

### Canary Pro

All the features of Canary Basic plus:

#### AlarmAssist™

Canary's AlarmAssist™ software diagnoses and troubleshoots every alarm in real-time, providing recommendations for remote or in-person corrective action.

#### Enhanced Compliance Reporting

Canary reviews and evaluates all leak detection records and generates a monthly Compliance Status Report (e.g. Pass / Not Pass) for each site. You also get a mid-month compliance exception summary identifying equipment at risk of non-compliance.

#### Enhanced Remote Control

Use our ATG Command Center buttons to program your tank monitor, run line tests remotely, schedule tank tests, and more.

#### Basic

**\$30 / site monthly**

Inventory Tools  
Real-time Alarm Notifications  
Remote Monitor Control  
Compliance Reporting

#### Pro

**\$65 / site monthly**
